

# Eurolana Wool Wash

**Eurolana Wool Wash** is a non-foaming detergent with deaerating effect.

## Instructions for Use:

### Wetting out agent prior to dyeing process (improves levelness of dyeing)

1. Add 20ml of Eurolana Wool Wash for every litre of warm water.
2. Soak fibre in liquid for 15-20mins.
3. Rinse, then place in container ready for dyeing.

### Pre-cleaning (washing) of soiled or dirty textile fibres prior to dyeing

1. Add 50ml of Eurolana Wool Wash for every litre of water.
2. Raise temperature to 60°C
3. Soak for 30-40mins, stirring occasionally.

## Health and Safety

- Keep contents closed and out of the reach of children
- Wear gloves, eye protection and protective clothing

## Disposal Method

Dilute with water. Do not empty in to drains or waters

## First Aid Measures

- |              |   |  |
|--------------|---|--|
